

SPARTUS® EasyARC 165

HANDY MMA INVERTER
WELDING MACHINE

TECHNICAL PARAMETERS

Input [V]	Welding Current [A]	Duty cycle [%]	No-load voltage [V]	Current consumption [A]	Weight [kg]	Dimensions [mm]
230	10 - 160	40	82	32	4	270 × 130 × 200

Additional Features: VRD

SPARTUS® EasyARC 165 is a simple inverter welder. It enables MMA and TIG Lift DC welding in range 10 – 160A. The applied IGBT transistors guarantee high efficiency of the device with low weight and small dimensions. Powered with a single-phase 230V source power.

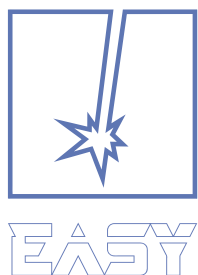

EasyARC 165 is equipped in easy to use and intuitive control panel allows precise control of welding parameters with one large knob. Devices have the power necessary for welding coated electrodes with a diameter of up to 4,0 mm. Additionally, it has a VRD function.

The welder machine and its equipment can be placed in a handy case included in the set.

Examples of use: renovation work in the field, workshop.

SPARTUS® EasyARC 165

WYPOSAŻENIE PAKIETU:

- Electrode holder
- Work clamp
- Box
- Shield
- Hammer with a brush
- Shoulder strap
- User's manual
